2030 S 2030 X

2030 Shredders include removable waste bag and automatic on/off for hands free operation.

high-security

High-Security Shredders

Standard's Level 5 Security Shredders exceed NSA/CSS Specifications 02-01 for Top Secret, COMSEC, INFOSEC, CRYPTOLOGIC, and SCI. They are a perfect fit for any agency that wishes to maintain high reliability along with high-security shredding. All Standard X5 High-Security Shredders shred to a particle size of 1mm x 4mm.

Choosing A Shredder That's Right For You.

When choosing a Standard shredder, be sure to ask yourself several questions.

- 1 How much do you shred daily?
- 2 What level of security is necessary?
- 3 What needs to be shredded? Is it paper, card stock, computer printouts?

Once you've come to a clear understanding of your shredding needs, it's easy to choose the right Standard shredder.

Local Authorized Dealer

Established in 1910, Standard is a leading supplier of duplicating and document finishing equipment.

Paper Shredders

Document Security

Easy To Use

Dependable

Quiet Operation

Standard Paper Shredders

for optimum document security

Standard Paper Shredders are an essential document security measure in an age where confidential information streams from copiers and computer printers. Regardless of the size of the office or organization, the need to protect information has never been more important. Standard's complete line of high quality and dependable paper shredders can provide the needed level of confidentiality for your document security.

A Model To Match Every Need

A comprehensive range of models makes selecting the perfect model for your needs easy. Standard's models include **Personal Shredders** for desk-side convenience, **Office Shredders** for everyday moderate office requirements, **Centralized Shredders** for departmental and company needs, **Industrial Shredders** to meet virtually any high volume demands and **High-Security Shredders** for top-secret and other high security document destruction needs.

All Standard shredders will accept staples and paper clips.

Strip-Cut and Cross-Cut Models

Standard Shredders are available in both **strip-cut** and **cross-cut** versions. Cross-cut shredders provide higher levels of security. In comparison to a strip-cut shredder, a cross-cut shredder increases the level of security by cutting each document into smaller particles. Cross-cut shredders also require fewer bag changes than similar sized straight-cut models due to the self-compacting action of the smaller cross-cut particles.

Each model combines ease-of-use, durability and quiet operation with their dedicated document destruction capability. The quality and professional appearance of the cabinet design fits with any office environment. The specially hardened steel cutting heads on each model accept paper clips and staples and provide a lifetime of reliable performance. Standard Paper Shredders are built to last and provide the highest levels of performance, customer satisfaction, and confidence.

Strip-Cut

A basic level of document security is provided with the 1/4" strip-cut or higher security 1/8".

Cross-Cut

The smaller particle size of the cross-cut is ideal for higher document security applications.

Standard's specially hardened steel cutting heads come in both strip-cut and cross-cut versions.

office

Office Shredders

The Standard line of Office Shredder meets the document security requirements for most office applications requiring greater speed and capacity than offered by our personal line of shredders. Included, as a standard feature on each of these models is an automatic shut-off control that detects when the removable waste bag is filled. Improve your document security by placing a Standard Office Shredder next to a copier or printer and help prevent leaks before they can happen. Disposing of documents securely helps to ensure that your information remains confidential.

3020 S 3020 X

Designed for higher-volume personal use or the small office, the 3020 is compact like the 2030 models but with increased sheet capacity.

3030 S 3030 X 3030 X⁴

These 10-gallon capacity shredders come on casters and can be moved as your office needs change. They are also available as cross cut security level 4.

3050 S 3050 X

Higher capacity feed width, sheet input and waste capacity. The 3050 shredders are economical console type shredders.

centralized

Centralized Shredders

Consideration of the level of security, multiple users, EDP/continuous forms usage and overall shredding volumes are important factors when deciding the optimal centralized shredder model. Designed with 16" feed width and a minimum 35 gallon waste capacity, Standard's Centralized Shredders are made to serve high volume shredding applications often across multiple departments. Their speed, sheet capacity, shred size and ease of use make them ideally suited to play an important role in maintaining office information security.

4010 S

Built on a strong, open metal stand, this shredder is rated for continuous forms up to 16" wide at a rate of 80 feet per minute.

4020 S 4030 S

The 4020 and 4030 shredders are console units with casters and include 35-gallon waste capacity and automatic shutdown when the waste bag fills.

4040 S 4040 X 4040 X⁴

Exceptionally fast and reliable, the 4040 Shredders include all electronic detection systems available in a paper shredder.

Lifetime Warranty

Standard's shredder cutting cylinders meet exceptional quality standards and are backed by our **Limited Lifetime Warranty** on the cutting cylinder on all models excluding the High Security Models. The cutting cylinders on **High Security** models are warranted for one (1) year from the date of purchase. Please see your Standard dealer for a complete warranty statement.

Level of Security¹

The highest priority is meeting your application's level of security. Each Standard model has one of the following security level designations to help you identify the right model(s) for your application.

- ① — For general document destruction
- ② — For internal documents and general correspondence
- ③ — For confidential documents
- ④ — For sensitive business materials/secret documents

NSA/CSS 02-01

For espionage-safe or extremely high demands of security as in military or government departments.
