Shipping Weight:	39 lbs.

All Specifications Subject To Change Without Notice  
Revised 9/06 | Item #1074

## Customize To Suit Your Inkjet Output Needs!

### True Coated Stock Performance.

The RENA TB-399 Dryer/Conveyor is designed to handle glossy and coated stocks with ease. The optional 1,000-watt drying unit has over 2300 BTUs of heat output to aid drying on hard to print materials. Textured belts keep materials under control, and the magnetic catch tray guides adjust to ensure everything stays in order.

### A Safe, Reliable Drying Solution.

The TB-399 runs from a standard 110V outlet - no need to rewire your production facility. The drying unit runs off the conveyor power and shuts down when the conveyor is turned off. The drying unit also has a separate power control so the TB-399 can be used with it on or off. The heat lamps have a protective mesh to prevent contact with materials or hands.

### Versatile Design.

With available adjustable legs and cross-stacking fence, the TB-399 can accommodate a wide range of jobs and materials. The TB-399 can be configured for almost any job on 3" x 5" cards to 9" x 12" flats and everything in between.

### Durable With A Great Value.

The TB-399 has tough steel and alloy construction that assures the owner of years of continuous use for a very reasonable price.
