DIMENSIONS	51" H x 28" W x 28" D
WEIGHT	280 lbs including shipping crate
ELECTRICAL	115VAC 50/60Hz - 20A
OPTIONS	Run In-Line with XPS-ProTab 4.0 or XPS-ProMail Base
DUTY CYCLE	240 million pieces total or 4,000,000 per month over a 5-year life cycle

The bullet-proof XPS-ProFeed Shuttle is a 280-pound feeding machine with a delicate touch. The vacuum actuated shuttle with four unique interchangeable plates can pull single sheet paper with finesse then run 5/8" thick booklets all day, everyday. It is the choice of professional mailers across the globe.

The difference is the stainless steel separation assembly that doesn't wear out. Once the XPS-ProFeed Shuttle is setup for a job it simply needs to have materials loaded in the hopper. It runs at production speeds up to 30,000 pieces/hour and interfaces with multiple types of equipment. It has a material jog function, extra-long material mode, and has an integrated Start/Stop control and Emergency Stop that communicates with our XPS-ProMail Base.

Why a shuttle feeder? Because it is a proven design that has stood the test of time. With the XPS-ProFeed Shuttle, we have taken the shuttle feeder to a new level of user-friendliness and functionality. The class-exclusive 12 individual feed-assist rollers or the Thick Media Pusher Block is a case in point. It can be attached for materials over 1/4" thick for an additional boost. Simple controls, intelligent engineering, thoughtful design - it is the best of the best.

Our heavy duty XPS-ProFeed Shuttle is a once in a decade investment that will be a reliable and low maintenance productivity solution that will return that investment many times over. Schedule a no hassle demonstration today.

KEY FEATURES

- Vacuum Shuttle Feed Assembly with two modes for normal and extra-long materials
- Runs inline with RENA Systems and popular brand console products
- Integrated Start/Stop and Emergency Stop with XPS-ProMail Console Base
- Material Jog function for simplified job setup and adjustments
- Heavy duty construction and smart features make this an essential part of your operation
